

Assumptions:

1. All routes do not need to correspond to a weekly flight.
2. We can model weekdays and years with no weekly flights.
3. All flights must be instantiated from weekly flights.
4. All weekly flights specified must have a determined route.
5. All routes must be between 2 airports.
6. Passengers and contact passengers without a corresponding reservation can not be stored.
7. Passengers do not need to have a corresponding booking in our model.
8. Stored passengers and contact passengers can be represented in multiple independent reservations.
9. Bookings need to include a ticket for at least one passenger.
10. Passengers can have more than one booking.
